

The Speak Up Survey is a national survey (**anonymous**) intended to collect and report the unfiltered feedback from students, parents, teachers and administrators on key educational issues related to instructional technology. The results of this survey will be provided to our district as well as state and national agencies. For our purposes, it will give us a better understanding of the knowledge level and expectations of all stakeholders related to educational technology.

As a Speak Up participant we will be part of a growing movement that values and uses their stakeholders' opinions to inform K-12 educational decisions. The top five reasons schools participate in Speak Up are:

- Collect unique data from their stakeholders.
- Conduct a needs assessment and create a vision for 21st century learning.
- Use the data to create inform technology initiatives or create strategic plans.
- Communicate our technology needs to our stakeholders.
- Measure the success of their technology initiatives.

Please take a few minutes to follow the link below and respond to the survey from the perspective of your role as a school administrator or classroom teacher. We know that you are very busy, but you help with this project will provide valuable information to us for planning purposes. Please encourage your students and their parents to complete the survey as well.
